

# Recognising and Responding to Deterioration in Aged Care Residents – Resource for General Practitioners

A collaboration between Ballarat Hospice Care, Grampians Region Palliative Care Consortium and its members, and Grampians Regional Palliative Care Team (Grampians Health).

**BALLARAT  
HOSPICE  
CARE INC.**

Home Based Palliative Care

**Project partners:** This project is a collaboration between Ballarat Hospice Care (funding recipient and project lead), Grampians Region Palliative Care Consortium and its members\*, and Grampians Regional Palliative Care Team (Grampians Health).

**Sponsors:** Victorian Department of Health and Australian Department of Health and Aged Care, Comprehensive Palliative Care in Aged Care (CPCiAC) Project Measure 2018

**Author:** Dr Russell Pearce, Medical Director Ballarat Hospice Care  
Email: [rpearce@ballarathospicecare.org.au](mailto:rpearce@ballarathospicecare.org.au)

**Contact:** Diane Nimmo, Strategic Projects and Research Manager, Ballarat Hospice Care  
Project Lead 'Comprehensive Palliative Care in Residential Aged Care Project'  
Email: [dnimmo@ballarathospicecare.org.au](mailto:dnimmo@ballarathospicecare.org.au)

**Project runtime:** 07/2024 – 06/2026

**Date:** June 2026

\* Specialist palliative care services that come under the Grampians Region Palliative Care Consortium include Ballarat Hospice Care, Wimmera Palliative Care Service, Western Health Bacchus Marsh Community Palliative Care, Central Grampians Palliative Care, as well as the region-wide consultancy service Grampians Regional Palliative Care Team.

# 1 Comprehensive Palliative Care in Residential Aged Care Project

## 1.1 Background

Over 60,000 people die in residential aged care every year. This represents about 30% of all deaths in Australia (1). Up to 50% of residents die within 6 months of admission (2). An estimated 90% of residents would benefit from a palliative approach to care due to expected deaths from a known life-limiting illness (3).

Residential aged care facilities play a vital role in providing generalist palliative care, particularly end-of-life care. For aged care staff to effectively meet the palliative care needs of residents, they must be equipped with the resources and frameworks that allow for early identification of those needs. Implementing these frameworks ensures that high-quality care is delivered not only to the residents but also to their families.

## 1.2 The Comprehensive Palliative Care in Residential Aged Care Project

Ballarat Hospice Care is leading a project aimed at enhancing generalist palliative care in residential aged care and improving access to specialist palliative care for residents with such needs. This is a Grampians region collaborative project between Ballarat Hospice Care, Grampians Region Palliative Care Consortium, and Grampians Regional Palliative Care Team. It is funded by the Australian Department of Health and Aged Care, as well as the Victorian Department of Health to strengthen comprehensive palliative care for aged care residents (4).

The top priority is to support residential aged care facilities in implementing a systematic approach to **identifying** and **responding** to palliative deterioration. Central to this is the introduction of an evidence-based, best practice palliative care needs assessment tool: the **Deteriorating Resident Tool (DRT)** (5) (see pages. 4 and 5). In addition, residential aged care facilities are provided with a flowchart (see page 9) outlining the trigger points for administering the DRT, as well as the responses to DRT assessment and symptom monitoring outcomes, reflecting the available supports and resources.

## 1.3 Why we are engaging with you

We are engaging with General Practitioners supporting aged care residents in order to

1. Assist General Practitioners and residential aged care facilities in the early identification of residents currently experiencing or at risk of deterioration.
2. Ensure that residents identified as deteriorating or at risk of deterioration have their needs and supports effectively met.

Using the above tools, combined with clinical judgement and/or concerns from the resident or family, will help identify those with current or impending palliative care needs. Aged care staff use this to make clinical decisions regarding commencing palliative care. Built into this process is a referral to the GP to initiate a range of strategies to anticipate and meet the palliative (including end of life) needs of the resident and their family.

These tools are used Australia-wide amongst palliative care services so ensure consistent communication between aged care staff, general practitioners, and specialist palliative care teams. This common language improves collaboration, enhances care coordination, and facilitates more effective decision-making.

## 1.4 Recommendations

1. Familiarise yourself with the Deteriorating Resident Tool; the Daily Symptom Assessment Scale and Problem Severity Score in particular.

Short videos are available here (approximately five minutes each):

- Symptom Assessment Scale (SAS):  
<https://www.youtube.com/watch?v=XN55LYHJ1C8&list=PLWPX8BkJzVmqgKII8NsPA314ZRyFcEYjf&index=7>
- Problem Severity Score (PSS):  
<https://www.youtube.com/watch?v=Gq6RRdylqco&list=PLWPX8BkJzVmqgKII8NsPA314ZRyFcEYjf&index=8>
- Australia-modified Karnofsky Performance Status (AKPS):  
<https://www.youtube.com/watch?v=OOzZqcX9oEE&list=PLWPX8BkJzVmqgKII8NsPA314ZRyFcEYjf&index=3>
- Rockwood Clinical Frailty Scale (RCFS):  
<https://www.youtube.com/watch?v=NPE-bRG6rA0&list=PLWPX8BkJzVmqgKII8NsPA314ZRyFcEYjf&index=9>

2. The DRT is completed routinely by residential aged care staff. When liaising with residential aged care staff, request the Deteriorating Resident Tool assessment outcomes - particularly the Symptom Assessment Scale and/or Problem Severity Score - as these will provide you with supporting evidence.

3. Based on DRT assessments, particularly changes in AKPS and RCFS, consider proactive palliative approaches to care such as advanced care planning, family discussions, medication rationalisation and/or anticipatory prescribing.

| <p><b>PCOC SYMPTOM ASSESSMENT SCALE (SAS)</b> Where possible, <i>ask the resident</i> to rate their symptom distress over the last 24-hours or nominate who rated the assessment. Can be completed by a registered/enrolled nurse or care worker with the resident and family wherever possible.</p> | ROCKWOOD CLINICAL FRAILTY SCALE (RCFS) <i>(Select one only)</i>                     |                                                 |                                                                                                                                                                                                                                                                                                                            |
|-------------------------------------------------------------------------------------|-------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|    | <input type="checkbox"/> 1. Very Fit            | People who are <b>robust, active, energetic</b> and <b>motivated</b> . These people commonly exercise regularly. They are among the fittest for their age.                                                                                                                                                                 |
|    | <input type="checkbox"/> 2. Well                | People who have <b>no active disease symptoms</b> but are less fit than category 1. Often, they exercise or are very active occasionally, e.g. seasonally.                                                                                                                                                                 |
|    | <input type="checkbox"/> 3. Managing Well       | People whose <b>medical problems are well controlled</b> but are not regularly active beyond routine walking.                                                                                                                                                                                                              |
|    | <input type="checkbox"/> 4. Vulnerable          | While <b>not dependent</b> on others for daily help, often <b>symptoms limit activities</b> . A common complaint is being "slowed up", and/or being tired during the day.                                                                                                                                                  |
|    | <input type="checkbox"/> 5. Mildly frail        | These people often have <b>more evident slowing</b> , and need <b>help in high order IADLs</b> (finances, transportation, heavy housework, medications). Typically, mild frailty progressively impairs shopping and walking outside alone, meal preparation and housework. <i>(Mild dementia usually corresponds here)</i> |
|    | <input type="checkbox"/> 6. Moderately frail    | People need <b>help with all outside activities</b> and with <b>keeping house</b> . Inside, they often have problems with stairs and need <b>help with bathing</b> and might need minimal assistance (cueing, standby) with dressing. <i>(Moderate dementia usually corresponds here)</i>                                  |
|   | <input type="checkbox"/> 7. Severely frail      | <b>Completely dependent for personal care</b> , from whatever cause (physical or cognitive). Even so, they seem stable and not at high risk of dying (within ~ 6 months). <i>(Severe dementia usually corresponds here)</i>                                                                                                |
|  | <input type="checkbox"/> 8. Very severely frail | <b>Completely dependent</b> , approaching end of life. Typically, they could not recover from even a minor illness.                                                                                                                                                                                                        |
|  | <input type="checkbox"/> 9. Terminally ill      | Approaching end of life. This category applies to people with a <b>life expectancy &lt;6 months</b> , who are <b>not otherwise evidently frail</b> .                                                                                                                                                                       |

### Identifying the need for palliative care

**YES to ANY** of these statements/questions/assessments below:

- ☐ Yes    ☐ No    Based on clinical judgement, the current assessment and all the information available to you, do you believe the resident would benefit from palliative care?
- ☐ Yes    ☐ No    The resident and/or family is requesting palliative care
- ☐ Yes    ☐ No    Based on clinical judgement, the current assessment and all the information available to you **do you believe the resident has a prognosis of <3 months?**
- ☐ Yes    ☐ No    One or more **moderate/severe** symptom distress (SAS) or problem severity (PSS) score
- ☐ Yes    ☐ No    An AKPS of 40 or less
- ☐ Yes    ☐ No    A Rockwood Clinical Frailty Scale (RCFS) score of 8 or 9

**YES to ANY** – Resident would benefit from Palliative Care (e.g. PACOP Outcomes Collection)

**NO to ALL** – Review care plan to address deterioration & continue to monitor using PACOP Profile Collection

PROFILE COLLECTION - Deteriorating Resident Tool 230120\_FINAL

Website: [ac-pc.com.au/wp-content/uploads/2024/10/Deteriorating-Resident-Tool\\_230120\\_FINAL.pdf](http://ac-pc.com.au/wp-content/uploads/2024/10/Deteriorating-Resident-Tool_230120_FINAL.pdf) - Accessed on 24/04/2025

The Deteriorating Resident Tool (DRT) is a standardised, evidence-based clinical assessment tool that provides residential aged care staff with the necessary framework to identify and evaluate the palliative care needs of residents.

By using this tool, staff can assess not only current symptoms but also predict the likelihood of future deterioration, allowing them to implement timely interventions.

The DRT is routinely administered at residential aged care facilities at the following trigger points:

- On admission
- As part of the standard resident review process
- Upon return from hospital (ED/Urgent Care Centre or hospital admission)
- When any staff member observes changes in the resident, e.g. after a fall, change of cognition, delirium, antibiotics, loss of appetite, loss of weight, behavioural change
- If requested by the resident, their family or friends

Completion of the DRT at resident admission to the residential aged care facility establishes a baseline for comparison of any future DRT assessments.

The DRT comprises of four evidence-based assessments, each of which plays a specific role in assessing either a resident's current palliative care symptom needs, or likelihood of deterioration.

Components of the DRT:

### 1. Symptom Assessment Scale (SAS)

The SAS is used to assess the presence and severity of the most common palliative care symptoms. The SAS is resident-rated (where possible) to provide a **holistic view** of the resident's symptom burden. Each symptom is rated on a scale from 0 to 10, with 0 indicating no distress and 10 indicating severe distress.

### 2. Problem Severity Score (PSS)

The PSS is **clinician-rated** and assesses the severity of issues across four key domains: Pain, "Other symptoms", "Psychological/Spiritual" & "Family/Carer". Each domain is rated on a scale from 0 (no problem) to 3 (severe problem).

### 3. Australia-Modified Karnofsky Performance Status (AKPS)

The AKPS is a **clinician-rated tool** that measures the **functional status** of a resident from 100 (normal, no disease, no complaints) to 10 (comatose/barely rousable). **Most residents will have an AKPS of 70 – 40.** Changes in AKPS and lower scores of AKPS are associated with poorer prognosis, especially in residents with advanced cancer.

Figure 1. Survival percentages based on AKPS for patients admitted to a community palliative care service. (6)

#### 4. Rockwood Clinical Frailty Scale (RCFS)

The RCFS is another **clinician-rated** tool that measures physical & cognitive frailty of the resident. It has nine levels, where level 1 = fittest for their age, nil issues, levels 2-8 describe increasing frailty (levels 7-8 are common for residents approaching end of life in ACHs), level 9 is for those who are terminally ill but not otherwise frail. Levels 5, 6 & 7 tend to correspond to mild, moderate & severe dementia respectively.

Frailty describes a state of reduced physiological reserves and inability to overcome stressors such as a fall, infection, or hospital admission. Higher severity of clinical frailty is associated with increased risk of adverse health outcomes including disability or death.

Figure 2: Survival Percentages based on Clinical Frailty Score (CFS) for patients aged 65 and older after presentation to the Emergency Department. To improve readability, the graph was cropped to 0.7 on the y axis. (7)

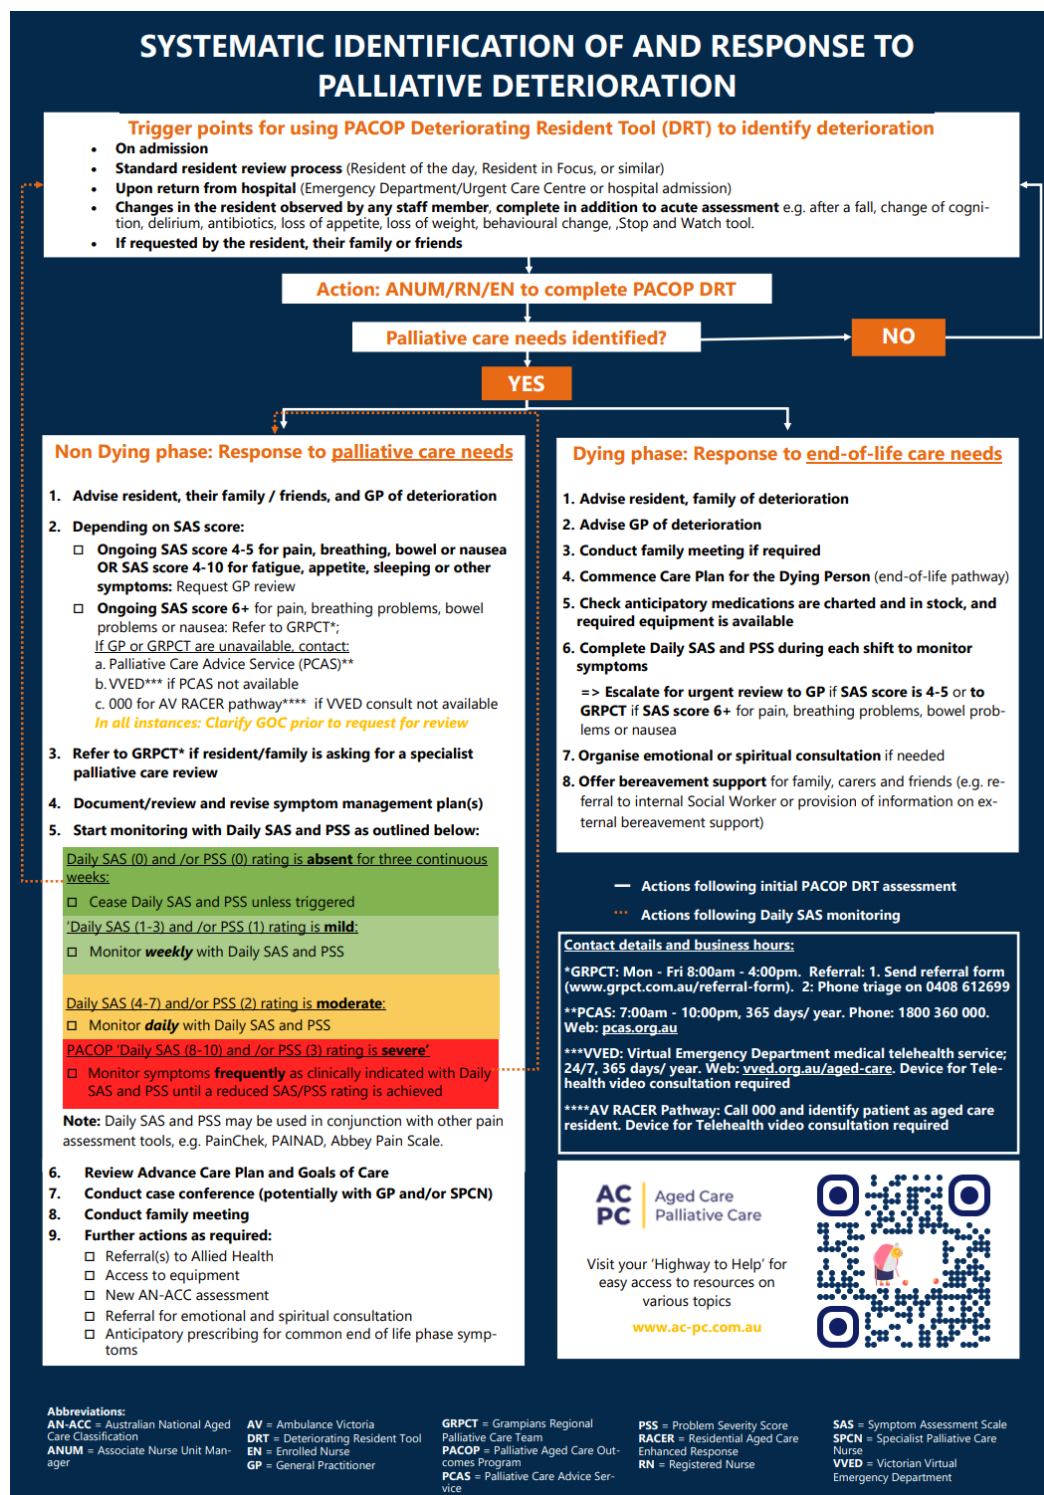

Figure 3: Survival after ED admission for age 70+ and critically unwell (defined as: Airway obstruction/stridor; oxygen saturation < 90%; respiratory rate < 8 or > 30 bpm; regular heart rhythm > 130 or irregular heart rhythm > 150bpm; systolic blood pressure < 90 mmHg; unconsciousness, defined as Reaction Level Scale (RLS) > 3 or Glasgow Coma Scale (GCS) < 8; ongoing seizure). (8)

### 3 Systematic Identification of and Response to Palliative Deterioration Flowchart

Generic example for the BHCI service area; to be customised for each facility if applicable.<sup>1</sup>

<sup>1</sup> **Please note:** This process map was developed for the Ballarat Hospice Care service area. The only variation relevant to your context is the specialist palliative care service that patients with complex palliative care needs are referred to. This is outlined in the map on pages 12-13 of this resource.

## 4 Specialist Palliative Care in the Grampians Region

While many aged care residents have palliative care needs that can be managed by aged care staff in collaboration with the resident's GP, some residents have more complex palliative care needs, requiring review by a specialist palliative care clinician.

The PACOP Deteriorating Resident Tool helps aged care staff to identify when a resident has more complex palliative care needs. The process map residential aged care facilities have been provided with guides their response to those identified complex needs, including a score-based prompt to refer to their local specialist palliative care service for review by a Specialist Palliative Care Clinical Nurse Consultant. Further escalation to a Nurse Practitioner or Palliative Care Physician is possible.

### Palliative care services in the Grampians region

Community palliative care services provide in-home specialist palliative care nursing support to people with a diagnosed life-limiting illness, their families, and carers in their homes or other community settings. Depending on the region these services also provide specialist support to residential care facilities. They aim to improve the quality of life for those with serious illnesses by managing symptoms, providing emotional and social support, and addressing spiritual needs. There are four community palliative care services in the Grampians region:

#### Wimmera Palliative Care Service

7-9 Robinson Street, Horsham 3400

Phone: 03 5381 9363

Fax: 03 5362 3480

Website: [whcg.org.au/index.php/about-us/services/hospice-care](http://whcg.org.au/index.php/about-us/services/hospice-care)

Online referral at: [referral.wpcs.bhci.pal.care](http://referral.wpcs.bhci.pal.care)

*Wimmera Palliative Care Service provide care to aged care residents.*

#### Central Grampians Palliative Care

PO Box 155, Ararat 3377

Phone: 03 5352 9465

Fax: 03 5352 9425

Website: [eghs.net.au/services/ararat/palliative-care](http://eghs.net.au/services/ararat/palliative-care)

Online referral at: [referral.cgpc.bhci.pal.care](http://referral.cgpc.bhci.pal.care)

*Central Grampians Palliative Care provide care to aged care residents.*

#### Ballarat Hospice Care

PO Box 96, Ballarat 3353

Phone: 03 5333 1118

Fax: 03 5333 1119

Website: [ballarathospicecare.org.au](http://ballarathospicecare.org.au)

Online referral at: [referral.ballarat.bhci.pal.care](http://referral.ballarat.bhci.pal.care)

*Please note: Ballarat Hospice Care **does not** currently provide care to aged care residents. In the Ballarat Hospice Care catchment, aged care residents are supported by Grampians Regional Palliative Care Team.*

#### Western Health Bacchus Marsh Community Palliative Care

PO Box 330, Bacchus Marsh 3340

Phone: 03 5367 9137

Fax: 03 5367 4274

Website: [bmm.wh.org.au/allied-community-health/palliative-care](http://bmm.wh.org.au/allied-community-health/palliative-care)

Online referral at: [referral.whbmcp.c.bhci.pal.care](http://referral.whbmcp.c.bhci.pal.care)

*Western Health Bacchus Marsh Community Palliative Care provide care to aged care residents*

These are free services.

### **Grampians Regional Palliative Care Team (auspiced by Grampians Health)**

The Grampians Regional Palliative Care Team (GRPCT) provides specialist medical and advanced nursing support throughout the Grampians region for patients with highly complex care needs. The team includes Palliative Care Physicians and Registrars, Nurse Practitioners and Clinical Nurse Consultants.

The GRPCT aims to support General Practitioners in the delivery of highly complex palliative care in the acute sector, aged care residential facilities, in the home or community.

GRPCT provides secondary consultation and patient assessment throughout the Grampians region. All community referrals into GRPCT are discussed with the patient and the treating general practitioner prior to the service seeing the patient.

In the Ballarat area, GRPCT also provide specialist palliative care nursing support to residential aged care facilities.

Referral: Aged care residents with complex palliative care needs may be referred to GRPCT by the aged care facility. If you would like to refer a patient to GRPCT, fax the referral form (accessible via [grpct.com.au/wp-content/uploads/GRPCT-Referral-Form-6-250723.pdf](http://grpct.com.au/wp-content/uploads/GRPCT-Referral-Form-6-250723.pdf)) to 5320 3893 and phone triage on 0408 612699. Available Monday to Friday, 8am – 4pm.

This is a free service.

## 7 Prompts for End-of-Life Planning (PELP) Framework

Quality care in the last 12 months of life

\*Specific requirements for voluntary assisted dying vary between each state and territory. Healthcare services should familiarise themselves with the [legislation in their jurisdiction](#) and ensure patients and their families have access to appropriate information.

## 9 Further Resources

### 9.1 Guidelines and Guidance Documents

#### **Anticipatory medicines - Statewide guidance for Victoria (Safer Care Victoria)**

Anticipatory medicines are injectable or sublingual medications prescribed to a person with a life limiting illness. These medications are prescribed and dispensed in preparation for a time when a person needs them. They are used to manage symptoms in the home with the goals of rapid relief and avoiding unplanned or unwarranted admission to a healthcare facility.

This document describes the use of anticipatory medicines for people with a life limiting or life threatening illness who are receiving palliative care or end of life care at their place of residence. It guides healthcare professionals in prescribing and obtaining supply of anticipatory medicines. It also supports healthcare professionals to assist carers to manage symptoms by using these medicines.

Website:

[safercare.vic.gov.au/sites/default/files/202003/GUIDANCE\\_Anticipatory%20medicines%20FINAL.pdf](https://safercare.vic.gov.au/sites/default/files/202003/GUIDANCE_Anticipatory%20medicines%20FINAL.pdf) - Accessed on 24/02/2025

#### **Opioid conversion ratios (Safer Care Victoria)**

Relative strength of opioids differs depending on the type of opioid and route of administration. Opioid conversion is a skill used by clinicians to ensure appropriate use of palliative medicines so that the patient receives optimal pain management. This document is used to guide clinicians to ensure that an effective and safe dose is used when an opioid rotation occurs such as when a patient on a pre-existing opioid loses the ability to swallow in the terminal phase.

#### **Syringe driver compatibility (Safer Care Victoria)**

This guidance is intended for clinicians that deliver palliative care to people in specialist and non-specialist settings. It is intended to be used with the support of specialist palliative care clinicians.

Website:

[safercare.vic.gov.au/sites/default/files/202102/GUIDANCE\\_Syringe%20driver%20compatibility%20FINAL\\_0.pdf](https://safercare.vic.gov.au/sites/default/files/202102/GUIDANCE_Syringe%20driver%20compatibility%20FINAL_0.pdf)

## 9.2 Information

### **Advance Care Planning Australia**

This is a national program that promotes advance care planning, including resources and national curriculum and learning. Advance care planning allows health professionals to understand and respect a person's future healthcare preferences, for a time when they become seriously ill and unable to communicate for themselves. All healthcare professionals and aged care workers have an important role to help with planning and ensuring people have choice in their care.

Website: [advancecareplanning.org.au](http://advancecareplanning.org.au)

### **ELDAC (End of Life Directions for Aged Care)**

ELDAC provides information, guidance, and resources to support palliative care and advance care planning. There is a specific section for General Practitioners and Nurse practitioners.

Website: [eldac.com.au](http://eldac.com.au)

### **Aged Care Palliative Care**

This website provides curated links to quality assessment, monitoring and communication tools, external support services, resources, bereavement support and more - primarily aimed at residential aged care staff, but also useful for General Practitioners.

Website: [ac-pc.com.au](http://ac-pc.com.au)

## 9.3 Supports

### **Palliative Care Advice Service (PCAS)**

- Free phone advice about palliative care and end-of-life care issues (for **non-emergency** health advice only)
  - Available 7am to 10pm on 7 days a week
  - This specialist palliative care services can support you with issues such as:
    - Symptom management
    - Prescribing
    - Converting medications from oral to injectable
    - Continuous subcutaneous infusions (syringe drivers)
    - Decision-making and advance care planning
    - Navigating the palliative care system
- They are unable to provide prescriptions, referrals, access medical records or replace the care of local healthcare providers.
- If you are a clinician and the PCAS nurse cannot resolve your query, the nurse will immediately transfer you to a palliative medicine specialist.
  - Phone: 1800 360 000
  - Website: [pcas.org.au](http://pcas.org.au)

## **Palliative care service search directory for Victoria (Palliative Care Victoria)**

Website: [pallcarevic.asn.au/directory/services](http://pallcarevic.asn.au/directory/services)

If the name of the service is not known: Under 'Search by other criteria'

- Click on 'search service type' to select option (community, consultancy, etc)
- Click on 'search service type' again if need to add more options to search
- Enter postcode OR suburb/town in relevant box
- Hit Enter button or click on 'Search'

## **Dementia Support Australia - GP Advice Service**

If you are providing medical support for someone living with dementia who is experiencing behaviours and psychological symptoms of dementia (BPSD) you can contact one of Dementia Support Australia's medical specialists for clinical advice and support through their email service.

Website: [dementia.com.au/who-we-help/health-care-professionals/services/gpas](http://dementia.com.au/who-we-help/health-care-professionals/services/gpas)

## **Royal Flying Doctor Service - Memory Lane**

Memory Lane is a no-cost service that will support patients in end of life care to visit a place that holds meaning for them. The service is entirely donor-funded and staffed by medically trained health care professionals who volunteer their time.

Website: [flyingdoctor.org.au/vic/what-we-do/memory-lane/](http://flyingdoctor.org.au/vic/what-we-do/memory-lane/)

## **9.4 Templates**

### **Comprehensive medical assessment**

Item 701/703/705/707 template

Website: [swsphn.com.au/wp-content/uploads/2022/02/Comprehensive-Health-Assessment-Word-pdf.pdf](http://swsphn.com.au/wp-content/uploads/2022/02/Comprehensive-Health-Assessment-Word-pdf.pdf)

### **Care plan review/contribution template**

Item 731 template

Website: [health.gov.au/resources/publications/care-plan-contribution-template?language=en](http://health.gov.au/resources/publications/care-plan-contribution-template?language=en)

## **9.5 Education (online)**

### **End of Life Essentials**

Free education modules designed to assist doctors, nurses and allied health professionals in delivering end-of-life care.

Website: [endoflifeessentials.com.au](http://endoflifeessentials.com.au)

### **‘The Advance Project - eLearning for GPs’**

A two hour online course covering: the role of GPs in advance care planning and palliative care provision; evidence-based tools for initiating advance care planning discussions; and assessing patients and carers palliative and supportive care needs.

Website: [theadvanceproject.com.au/Education-Training/General-Practice-Training/General-Practitioners](http://theadvanceproject.com.au/Education-Training/General-Practice-Training/General-Practitioners)

### **‘Healthcare Communication Collective’**

In-person communication skills training to integrate evidence-based communication skills into clinical practice, especially for ‘hard’ conversations in patient care, to improve clinicians’ confidence, effectiveness, and person-centeredness.

Website: [healthcommcollective.com.au/](http://healthcommcollective.com.au/)
